

MKS Connector for CA Plex

New plug-in interface to MKS Implementer (and 2E CM)

The MKS Connector for CA Plex integrates your CA Plex development environment with the MKS/CM Application Lifecycle Management environment.

The screenshot shows the CA Plex Workbench interface. A 'Select for Import' dialog box is open, displaying options for importing objects. Below the dialog, a table lists objects with columns for Opt, Mbr/obj, Code, From env, To lib/env, User, Type, and Status. A yellow starburst graphic highlights the text 'Source/Object and Model Management Integration'.

Opt	Mbr/obj	Code	From env	To lib/env	User	Type	Status

Automation and Audit of CA Plex development

The MKS Connector for CA Plex is a powerful plug-in interface between CA Plex and MKS Implementer or CA 2E/CM, allowing developers and managers to consolidate and automate change management processes and gain full control of the CA Plex model environment. In addition to facilitating compliance to required IT audit standards, the MKS Connector will save time and money for your development team by eliminating tedious, error prone manual promotion and model update steps.

Key Features:

- Check out development objects directly to MKS Implementer from CA Plex.
- Use CA Plex lists, packages or subject areas to check out multiple objects.
- Gain security and control over the model update and extract process
- View audit traceability of model changes by user and object
- Automate common model manager activities, including creating/distributing local models and managing updates
- Email developers and managers status of promotion events
