

# MKS Connector for CA Plex

## MKS Model and Source/Object Plug-in for CA Plex organizations

Feature	Description	Benefit
<b>Check out all objects and manage model artifacts from CA Plex</b>	Developers can check out MKS Implementer / CM objects from the CA Plex environment. Typical Plex implementation objects supported, including DLL, PNL, C# Assemblies, Java classes, and Websyidian/WebClient html.	Stay in the CA Plex GUI environment to accomplish promotion tasks, eliminating distractions caused by application switching. Integrate web and client-server application configuration into MKS.
<b>Use lists, subject areas, and packages</b>	Work with multiple objects as usual in CA Plex, with lists, subject areas, or packages. Directly import into MKS.	Eliminates the need to manually maintain separate lists of promotion package objects. Save time when working with large promotion projects.
<b>Control CA Plex model management</b>	Complete model management feature - manage model activities including update, extract, distribution, and archive.	Places Plex model management under full security control, and automates time consuming model management activities.
<b>Audit trail of model actions</b>	Complete audit tracking of model activities, including programmer, date, and object affected. Search facility for researching changes.	Enables full compliance traceability of model updates to the object level, previously difficult with CA Plex development.
<b>Email developers and managers</b>	Email notifications of development milestones, such as group model update or extract.	More efficient communication between developers, model managers, and project leads.
<b>Flexible configuration</b>	Configuration module with flexible options around development environments and preferences,	Integrate the software into your unique environment at installation.
<b>World class services</b>	Services available for installation, configuration, training, and customization	Achieve the full return on investment that MKS ALM can bring to your CA Plex environment.
<b>Works with Synon CA 2E/CM</b>	Fully supports the CA 2E / CM version of MKS Implementer.	Manage CA 2E and CA Plex development under the same MKS environment, eliminate separate change management software or manual procedures.
